DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 18 April 2005 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 18 April 2005 was filed after the mailing date of the Notice of Allowance on 28 January 2005. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

3. Claims 1-8 and 10-18 are allowed.

4. The following is an examiner's statement of reasons for allowance: The above claims were previously allowed in the Notice of Allowability mailed 28 January 2005, and the reasons for allowance are repeated below in this office action.

5. Applicant has amended lone independent claim 1 to include the limitation of cancelled claim 9 and further recite that the first and second electrodes are formed on

Art Unit: 2879

one surface side of the light-emitting layer and an electrically conductive material is placed on another surface side of the light-emitting layer that is opposite to the one surface side. Applicant's remarks along with this amendment are persuasive.

6. Thus, regarding independent claim 1, the prior art of record neither shows or suggests an electroluminescence light-emitting sheet comprising, in addition to other limitations of the claim, an electrically conductive material placed on a surface side of the light-emitting layer opposite to the surface side of the light-emitting layer that the first and second electrodes are placed.

7. The subject electrode structure described above is provided for realizing many different types of changes of light emission by the electroluminescence light-emitting sheet. Due to their dependency upon independent claim 1, claims 2-8 and 10-18 are also allowable. The design is new and unique to the art.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
